

## AC512-02 AC trigger

This is a smart wireless transmitter which works together with the projectors and electric projection screens. There is no need extra control to open and close the screen intelligently.

### Features

- ❖ Self check and study projector current when the first power on/off on the projector
- ❖ Make the linkwork with the projector and projection screen
- ❖ Inspecting the projector current all the time, transmit RF signal to the receiver automatically, then make the screen open or close automatically
- ❖ Standard power socket, easy to install
- ❖ With hang holes on back cover, easy to fix
- ❖ Full automatic operation mode, to achieve the intelligent system
- ❖ Working with all A-OK receivers

Working Voltage	Frequency	Transmitting power	Working temp	Transmitting power
AC 230V / AC 120V	433.92MHz	≤10mW	-20°C~+55°C	10W-100W
