

AM36

DC Linear window opener

A-OK linear motors widely apply to motorized sash doors, casement windows and various skylights. A-OK linear motor is particularly suitable for windows mounted in high position, where people hard to reach. Working with different kinds of automation control systems like smoke detector and temperature detector, it would be easy to operate the windows open and close automatically.

Dimensions

Features

- DC24V supply
- Quiet run
- Stop on obstacle

- ❖ DC24V safety voltage, meet with fire certificate
- ❖ With Overload and over current protection
- ❖ Long service life, more than 10000 times open and close

- ❖ Pull and push force torque range from 600Nm to 1500Nm
- ❖ High IP class protection
